

## NDLAMBE MUNICIPALITY

## Water Services Notice

### BATHURST

The Municipality would like to inform residents of Bathurst that there is currently no electricity supply in the area surrounding the Water Treatment Plant. As a result, the plant has not been able to operate and our reservoir have been depleted.

The backup generator to the plant experienced a fault and is currently undergoing repairs. Our technical team is attending to the matter as a priority to restore operations as soon as possible.

In the interim, the Municipality is making arrangements to provide water through tankering to affected areas

We apologise for the inconvenience caused and request the patience and understanding of residents.

**PLEASE USE WATER SPARINGLY**
