

NDLAMBE MUNICIPALITY

Water Services Notice

PORT ALFRED

The municipality would like to inform residents of Port Alfred that the 2 ML Reverse Osmosis (RO) Plant has experienced a mechanical breakdown. This plant contributes significantly to the town's water supply.

As a result of the breakdown, overall water availability to Port Alfred has been reduced. This is placing the system under considerable strain and resulting in limited water supply across the town. **Residents are therefore urgently requested to use water sparingly.**

The municipality is actively working to restore the plant to operation as soon as possible.

We apologise for any inconvenience caused and request your patience and understanding while we work to resolve this issue.

PLEASE USE WATER SPARINGLY

ROLLY DUMEZWENI

MUNICIPAL MANAGER
