

NDLAMBE MUNICIPALITY

Water Services Notice

PORT ALFRED

The Municipality wishes to inform residents of Port Alfred that the 2 ML Reverse Osmosis plant and the 1 ML Reverse Osmosis plant have been temporarily shut down due to high turbidity levels in the raw water caused by the recent rainfall.

This temporary shutdown is necessary to protect the RO membranes and associated treatment equipment from damage. As a result, water production for Port Alfred will be reduced during this period.

The technical team will continue to monitor the raw water quality and the RO plants will be restarted as soon as the turbidity levels return to acceptable levels.

Residents are kindly requested to use water sparingly during this period.

.

The municipality apologises for the inconvenience caused.

PLEASE USE WATER SPARINGLY

ROLLY DUMEZWENI

MUNICIPAL MANAGER
